

## **LRF HHTI-LR Draft RFP – One-on-one Meetings**

### **Technical Demonstration**

#### **1 General**

- 1.1 Industry is invited to provide to Canada an in-person technical demonstration of their proposed system to meet LRF HHTI-LR requirements.
- 1.2 Participation in the provision of technical demonstrations is limited to those companies that are participating in one-on-one meetings related to the review of the LRF HHTI-LR Draft RFP.

#### **2 Scope of Technical Demonstration**

- 2.1 The intent of the technical demonstration includes:
  - Demonstration of key capabilities of the proposed system
  - Provision of a hands-on experience of system operation to key project stakeholders
  - Providing a forum for the discussion and clarification of requirements specified in the System Requirements Specification (SRS)
- 2.2 Each technical demonstration session will be a one-one-one session between Canada and an LRF HHTI-LR potential bidder from Industry.
- 2.3 Technical demonstrations will be planned and conducted at Industry expense.
- 2.4 Technical demonstrations should take place in the National Capital Region of Canada, at a location to be determined by Industry.
- 2.5 Each technical demonstration session will be limited to three hours. Technical demonstrations should typically start in the early evening before dusk, to enable project stakeholders to experience functionality of the system under conditions of darkness.
- 2.6 Technical demonstrations are limited to the three-week period starting May 29 and ending June 16, 2023. Dates will be allotted on a first-come, first served basis, based on Canada's project team availability.
- 2.7 Should Industry want to conduct the technical demonstration at CANSEC, a private space will be required to which the general public will not have access.
- 2.8 The format and content of the technical demonstration is left to industry to determine, but must include a minimum of one hour reserved for the discussion and clarification of requirements specified in the SRS.

2.9 Canada's participation in the Technical Demonstration may include:

- Contracting authority or representative(s)
- Fairness Monitor
- Technical authority or representative(s)
- Representatives of Project Sponsor (user representatives)

### **3 Instructions to Industry**

3.1 If Industry is interested in providing a technical demonstration, they must contact the PSPC Contracting Authority, as identified on CanadaBuys, and provide the following information:

- Company name and identification of proposed system
- Up to three preferred dates, in order of preference
- Preferred start time
- Contact name for further correspondence related to the Technical Demonstration

3.2 In support of the technical demonstration, Industry should provide:

- An electronic copy of an English-language user manual and / or quick reference guide two weeks prior to the Technical Demonstration
- A minimum of one proposed system (two is preferable) including tripod
- Sufficient internal batteries, battery recharger or external power source to power the LRF HHTI-LR throughout the technical demonstration
