SOLICITATION AMENDMENT 008

This amendment is hereby raised:

1. To include questions and responses regarding the bid solicitation.
-

1. Questions and responses 57 - 59

Q57 - Section 11.22 C.2.6

The blank off flange for the Sea Chest outlet is listed as a 250 mm thick flange. Should this not be 25 mm thick flange?

R57

Sea Chest outlet blank off flange must be 25 mm thick. Refer to Amendment 007 page 12/51 Section 11.22.C.2.6.

Q58 - Section 11.25 D.3

Veuillez fournir SVP une liste de toutes les soupapes des sections D.3.2 et D.3.3.

R58

Le soumissionnaire doit fournir un prix pour la révision de 65 soupapes. Une liste des tailles et des types de soupapes et des dessins associés a été ajoutée au TDP modifié un dossier séparé ici : [JLM - Valve List and Details - Google Drive](#)

Q59 - Section 14.1.E.2

It specifies that the Contractor must arrange to have VARD Electro Norway, design and supply Equipment and Commissioning Services. We believe that Canada would have everything to gain from allowing the manufacture & supply of the equipment (synchronization cabinet, connection cabinet, installation kit for main switchboard in cell #12, shore power connection box) and commissioning by a Canadian supplier. We understand that design engineering is undergoing with VARD Marine but equipment and installation could be supplied by others. Please confirm that Canada can accept alternatives to VARD Electro and allow the Contractor to meet the requirements of this section from Canadian suppliers?

R59

A key requirement of this modification is short time paralleling capability between ship and shore sides, which must be integrated into IAS and PMS systems. Both systems were designed by VARD Electro Norway. Moreover, VARD Electro Norway holds IP rights for IAS and PMS programming and continues to support these systems. For consistency of spare parts and support services, Canada would benefit from having this equipment designed and supplied from the same source, i.e., VARD Electro Norway. The successful Contractor must coordinate with VARD Electro Norway during the implementation and commissioning of this system.

END OF SOLICITATION AMENDMENT 008
