**THIS AMENDMENT IS RAISED TO CHANGE THE RESPONSE INSTRUCTIONS, PRELIMINARY PROCUREMENT STRATEGY, INDUSTRY DAY AND ONE-ON-ONE SESSIONS AND RELATED DOCUMENTS. THE FOLLOWING REVISIONS ARE:**

1. At Part 2 – Response Instructions and Information, 2.1 Nature and Format of Responses Requested, ADD the following,

“2.1.1 In the 2<sup>nd</sup> round of industry engagement, Suppliers will be given an opportunity to conduct product demonstrations through scheduled one-on-one sessions.

Further, Canada will be seeking input and responses to specific questions related, but not limited to, Costing, Industry Capability, specific Product Demonstration Questions, Procurement, ITB/VP and Sustainment, necessary in refining the requirements and developing its procurement strategy. Additional information and questions for Suppliers will be provided prior to the upcoming event.”

2. At Part 3 – Preliminary Procurement Strategy, ADD the following,

“3.6 Product Demonstrations (2<sup>nd</sup> One-on-One Session)

Following the Industry Day and the initial One-on-One sessions conducted in March-April 2022, the Camp Sustain Project Team has since been developing its Requirements. In this round of industry engagement, Suppliers are invited to demonstrate their products, its capabilities and technology readiness. And with the aim of having deployable camp infrastructure and utilities systems ready and available by IOC/FOC, which will be identified in the final Statement(s) of Work/Requirement, the planned demonstrations will be reserved to Suppliers whose products meet the following technology readiness levels, Level 7 to Level 9, as outlined below.

**Level 9: Actual technology proven through successful deployment in an operational setting.** At this level there is actual application of the technology in its final form and under real-life conditions, such as those encountered in operational test and evaluations. Activities include using the innovation under operational conditions.

**Level 8: Actual technology completed and qualified through tests and demonstrations.** At this level the technology has been proven to work in its final form and under expected conditions. Activities include developmental testing and evaluation of whether it will meet operational requirements.

**Level 7: Prototype ready for demonstration in an appropriate operational environment.** At this level the prototype should be at planned operational level and is ready for demonstration of an actual prototype in an operational environment. Activities include prototype field testing.
