Priorities in Marine Procurement

Emily Wehbi, Director, Marine Services and Strategic Initiatives,
Public Services and Procurement Canada

Emily.Wehbi@tpsgc-pwgsc.gc.ca

Future opportunities to do business with Canada will include requirements in support of the following priorities:

- Increasing Indigenous Participation in Federal Procurement
- Gender Based Analysis Plus
- Greening

Indigenous Participation in Procurement

Common themes in Indigenous Procurement:

1) 5% Mandate Letter Commitment: Mandatory *minimum* target of at least 5% of the value of federal departments' contracts to be awarded to Indigenous suppliers.

- Can be accomplished through subcontracting.
- Both goods and services contract values apply.

2) Indigenous Participation Plans: May present as a requirement to bid on an RFP. Could include apprenticeship opportunities.

3) Joint ventures: 51% ownership and control must be held by an Indigenous person. A minimum of 33% Indigenous content is also required.

Indigenous Participation Plans

Business Development

When prime contractor(s) contribute and invest in building and developing viable Indigenous business capacity by procuring goods and services from Indigenous firms

Example: Subcontracting

Employment

The Prime Contractors recruit and retain Indigenous employees

Indigenous Participation Plan Components

Training and Skills Development

Prime contractor providing training and skills development through such measures as apprenticeships, on-the job training, in-house training as well as succession plans.

Innovative and Indirect Capacity Building

Other relevant measures (indirect benefits) related to capacity building such as, specialized training, career development, scholarships and community outreach to help Indigenous communities in meeting their economic development needs.

Gender Based Analysis Plus

- Means of assessing how diverse groups of women, men and gender diverse people may experience government policy and programs.
- Opportunities and biases an individual face may be impacted not only by gender, but other forms of identity as well such as age, income etc.
- Government of Canada's approach on Gender-based Analysis Plus: [Government of Canada's approach on Gender-based Analysis Plus - Women and Gender Equality Canada](#)

Greening and Innovation

- Requirement driven (what vs. how).
- Greening areas of focus: decarbonization, fuel efficiency, recycling, invasive species mitigative measures, and shore power.
- GC programs to watch:
 - IDEaS: Innovation for Defence Excellence and Security (DND)
 - Clean Transportation Systems Research and Development Program (TC)
 - Strategic Innovation Fund (ISED)
