Description:

The Royal Canadian Mounted Police Depot, located in Regina, Saskatchewan has need of Fused Deposition Modeling (FDM) 3D printers with increased build volume for prototyping and manufacturing end use parts. The RCMP is currently limited with the printers it has already that limit the size of the parts that can be printed at one time. This requirement will provide the RCMP with increased design and manufacturing options and reduce the costs to the RCMP as projects that cannot be printed in house, due to build volume limitations, must be outsourced.

All the deliverables must be received on or before November 31, 2023 if possible.

This procurement has been conditionally set aside under the federal government's Procurement Strategy for Indigenous Business (PSIB). In order to be considered, a supplier must certify that it qualifies as an Indigenous business as defined under PSIB and that it will comply with all requirements of PSIB.

Basis of selection: *Lowest priced compliant bidder.*
