Solicitation Amendment

Title: Security Services at the Canadian National Vimy Memorial and the Beaumont-Hamel Newfoundland Memorial

Solicitation Amendment 001

The solicitation is hereby amended to provide the following questions and answers:

Q1. As part of the RFP for Canadian memorials, I would like to have some additional information regarding remote monitoring:

- In the financial offer you ask for a “monthly doubt removal rate” (excluding travel costs) “ Is doubt removed via image-taking radars? What do you mean by “excluding travel costs”?”

A1. Veterans Affairs Canada does not use imaging radars to “remove doubt”. The doubt removal service at the Canadian National Vimy Memorial and the Beaumont-Hamel Newfoundland Memorial requires an on-site visit by someone from your company. The monthly doubt removal cost is for access to the service and excludes the on-site visit of a person from your company to the scene of an alarm triggering. These onsite visits are to be billed separately.

Q2. In addition, can you tell me the average number per year of requests for a response to an alarm?

A2. The average number of requests for a response to an alarm is roughly 12 per year.

Q3. We have a question regarding section 5.2.2 Security requirement - documentation required:

We have noted that during a call for tender we must include certification of the security requirements checklist to obtain authorization. However, we have not understood to which organization we should send this list. Can you confirm if we must submit it to you?

A3. As per Article 5.2.2, Security Requirements – Required Documentation, Bidders are required to complete the Application for Registration and submit it with their proposal. The Application for Registration is located at Annex H of the Request for Proposal.

Q4. In the RFP it is indicated that we have the possibility to suggest technological security improvements to you, no later than 5 days before submissions are made.

To this end, allow me to present to you PATROLBOT, our autonomous surveillance robot.

We are convinced of the interest of this technology for two reasons:

- During the day he would make a perfect complementary pair to the security agent to reinforce the level of security of the sites
- At night it would make a perfect autonomous surveillance patrol and could intervene without delay in the area where an intrusion alarm would be triggered to deter criminals and transmit live video to our Remote Surveillance center

A4. VAC appreciates your suggestion. However, considering the nature and context of the sites, VAC requires the services to be provided in our stated manner, as per Annex A, Statement of Work and therefore we will not be updating our requirement.

All other terms and conditions of the solicitation remain unchanged.

All enquires on the solicitation must be addressed to:

Name: Susan O'Brien

Telephone No.:902 314 8488
