

AMENDMENT 001

QUESTIONS AND ANSWERS

Q1. Is it necessary to have a standalone bioreactor that is compatible with the Aspect Biosystems RX1 microfluidic Bioprinter based bioprinter, or can we integrate the bioreactor within our own bioprinter?

A1. NRC is using Aspect Biosystems RX1 bioprinted tubes, however other bioprinters can probably print similar hollow structures.

As long as all the essential outcomes are met, a design that integrates a different bioprinter will be considered.
