This amendment is raised to address the following:

- To respond to questions received during the solicitation period; and
- To revise the solicitation accordingly, as applicable.

QUESTIONS AND ANSWERS

Q.1: NSA items 8 and 9. The industry standard practice is to produce frameless glass panel-mounted screens to coordinate with the actual lengths of the panels they're to be mounted on, i.e. 30" screen on 30" panel, 60" screen on 60", etc. . This is to support the proper attachment bracketry and meets BIFMA standards for safety and stability. Will the CA allow the supplier to use standard lengths to complete the requirement as provided by the floor plan?

A.1:

The intention is to have the glass toppers span the longest lengths possible of the workstation they are surrounding - it is understood that there will be vertical breaks in the panels at locations where panels change directions. To assist in locations/placement of these glass toppers in relation to the workstations below is a list:

- SEAT 18 is intended to have one of each of these lengths 60", 78" and 30".
- HOTEL 2 is intended to have one of each of these lengths, 90" and 54".

Q.2: NSA frameless glass topper panels, our standard heights are 8" or 16" to align with the SA seated and work surface height privacy requirements. Please accept either an 8" or a 16" height panel.

A.2:

16" glass toppers are acceptable.

Question: 3 We don't see anywhere on the evaluation tables to input a total for Hardware. Is hardware to be added after the award? If not, please include a line item under "Table 8" for Hardware per the SA RFB typical response forms.

A.3:

All pricing for hardware to be included in its respected furniture Category Unit Price.
We will upload amendment with tables for all categories for your convenience.

Q.4: Per the SA, only categories 1, 2, & 5 may be combined when indicated on a single reward. Categories 3 and 6 need to be separated into their own respective awards. Please revise the document so we can bid under the rules and requirements of the RFSA.

A.4:

We will upload an amendment and combined categories 1, 2 & 5 for evaluation purpose

Q.5: We are also asking to provide the CAD files as well.

CAD file will be available after contract award.

Q.6: would there be an opportunity for the delivery and installation to be on the same date? We noticed there is a gap between the delivery and install dates. As per your discussion, you mentioned that there is opportunity for us to deliver and install during the same time frame, as long as it does not exceed the January 2024 date

A.6: Installation may occur on the same day as delivery. The finalized installation date is per Table 3 – Installation in the Request for Bids document.

Q.7: Concerning electrical – after our initial review of the floor plan – will the RCMP require electric hookups or power to the unit (desk/workstation)? As per our discussion, I have understood that we are required to provide the wiring within the desks/workstations for this bid.

A.7: Electrical requirements are per Annex A-1 of the Supply Arrangement Agreement

Deleted

Step -2 : RFB

Canada will assess bids and award contracts on a per category basis. For administrative purposes, in the event a same bidder wins more than one category, Canada may issue a single contract containing the categories won by the same bidder.

**ANNEX A
REQUIREMENT and BASIS OF PAYMENT**

1. Category Selection

Combined Categories Rule:

For reasons of compatibility, the following categories will be combined for evaluation and contract award purposes:

The rule only applies to the categories below that are checked. The unchecked categories will be evaluated separately and may be awarded to multiple suppliers;

Category 1

Category 2

Category 5

*** Exception: when using the Cat 1, 2, 5 combined categories rule, IU's may calculate the percentage of NSA product allowed (as defined in their solicitation document) against the total quantity of the combined categories.**

Design Upgrade Rule:

The IU may exercise an option to upgrade products up to 20% of each Category product total before Applicable Taxes after contract award.

The Design Upgrade amount is used at the discretion of the Project Authority (PA) **prior to the manufacturing/ordering of the products**; the PA will provide the Contractor with a written notice of Canada's Design Upgrade choices for each of the product(s) to be upgraded. The Contractor will provide the pricing of the upgraded product(s) to a maximum of 20% of each Category Contract Price of Table 8. The Contracting Authority will issue an amendment to the contract with the Design Upgrades and pricing.

The Supplier certifies that all the Design Upgraded products offered will conform to all specifications and meet the testing requirements detailed in the Specifications of the Supply Arrangement.

Design Upgrade: is the process of replacing a product with a more innovative or enhanced version of the same product.

NSA:

NSA products can be incorporated in the RFB and must not exceed 30% of the firm quantity by category. NSA items must be added to the category that is most closely related and must be generic.
