Failure to comply with Canada's request and meet the requirement within the prescribed time frame will render the offer non-responsive.

Definitions

For the purposes of this clause,

"former public servant" is any former member of a department as defined in the [Financial Administration Act](#) R.S., 1985, c. F-11, a former member of the Canadian Armed Forces or a former member of the Royal Canadian Mounted Police. A former public servant may be:

The lump sum payment period does not include the period of severance pay, which is measured in a like manner.

"*pension*" means a pension or annual allowance paid under the [Public Service Superannuation Act](#) (PSSA), R.S., 1985, c. P-36, and any increases paid pursuant to the [Supplementary Retirement Benefits Act](#), R.S., 1985, c. S-24 as it affects the PSSA. It does not include pensions payable pursuant to the [Canadian Forces Superannuation Act](#), R.S., 1985, c. C-17, the [Defence Services Pension Continuation Act](#), 1970, c. D-3, the [Royal Canadian Mounted Police Pension Continuation Act](#), 1970, c. R-10, and the [Royal Canadian Mounted Police Superannuation Act](#), R.S., 1985, c. If so, the Offeror must provide the following information, for all FPS in receipt of a pension, as applicable:

By providing this information, Offerors agree that the successful Offeror's status, with respect to being a former public servant in receipt of a pension, will be reported on departmental websites as part of the published proactive disclosure reports in accordance with [Contracting Policy Notice: 2019-01](#) and the [Guidelines on the Proactive Disclosure of Contracts](#).

4. Enquiries - Request for Standing Offer

All enquiries must be submitted in writing to the Standing Offer Authority no later than five (5) business days before the Request for Standing Offer (RFSO) closing date. Enquiries received after that time may not be answered.

Offerors should reference as accurately as possible the numbered item of the RFSO to which the enquiry relates. Care should be taken by Offerors to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that Offerors do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all Offerors. Enquiries not submitted in a form that can be distributed to all Offerors may not be answered by Canada.

5. Applicable Laws

The Standing Offer and any contract resulting from the Standing Offer must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Offerors may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their offer, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Offerors.

Section I: Technical Offer

In their technical offer, Offerors should explain and demonstrate how they propose to meet the requirements and how they will carry out the Work.

Section II: Financial Offer

Offerors must submit their financial offer in accordance with **ANNEX B – BASIS OF PAYMENT**. The total amount of Applicable Taxes must be shown separately.

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

1. Evaluation Procedures

- (a) Offers will be assessed in accordance with the entire requirement of the Request for Standing Offers including the technical and financial evaluation criteria. Financial evaluations will be based on the combined lowest price per service area.
- (b) An evaluation team composed of representatives of CSC will evaluate the offers.

1.1.1 Mandatory Technical Criteria

Offers will be evaluated to determine if they meet all mandatory technical criteria outlined in **ANNEX D – EVALUATION CRITERIA**. Each service area bid on must comply with the outlined requirements in **ANNEX H – AREA OF SERVICE**. This may result in multiple standing offer holders (up to 8), with each service area with one contractor awarded only.

Offers containing a financial offer other than the one requested at **Article 3. Section II: Financial Offer** of **PART 3 – OFFER PREPARATION INSTRUCTIONS** will be declared as non-compliant.

The overall bid price will be calculated by adding the Shredding Service and Rental Fees per service area. The lowest combined price of shredding and rental services will be awarded per service area. Delivery must include all travel costs including delivery, mileage and fuel.

ANNEX K
TECHNICAL SPECIFICATIONS (RCMP)
Mobile Destruction Services (Shredding)

(Information from the RCMP Security Equipment Guide G1-001)

Due to access to the Security Equipment Guide (G1-001) being restricted to Government of Canada departments and agencies, here are the specifications the RCMP have approved for proper destruction of Protected A & B information. Information in this Appendix was taken directly from the RCMP Security Equipment Guide website.

Approved destruction equipment and processes are limited to specified media and security classifications. The term Type is used to describe in a single term the security ratings by class of equipment for shredders and disintegrators for paper and other text based media as follows:

Type of Shredder, for the purpose of this Standing Offer:

- **Type II (Level 6):** a special sub-category reserved for RCMP approved and SEG listed high security shredders which meet the NSA (USA) standard 02-01 for high security paper shredders. These exceed the security and performance requirements of the RCMP Destruction Standard and are recommended for cases where a TRA recommends a higher degree of security (e.g.: embassies, overseas deployments, smaller than 12 point font text size.)
- **Type III:** a shredder or disintegrator approved for the secure destruction of Confidential and Protected A & B (subject to a TRA) information written on paper or other text based media.
- **Type IIIA and Type IIIB:** sub-categories of Type III for office shredders and disintegrators. Type IIIA is for regular use and Type IIIB is for the destruction of information in bulk (only). Bulk Destruction (for Type IIIB) means the destruction of large amounts of material in a single session. A large amount means at least one ream (500 sheets) or approximate equivalent (such as a full refuse bag) in a single session. The intent of this provision is to positively exclude single page destruction for this larger size.

Selection Guide (Paper and other text based media)

Type II destruction equipment is defined as shredders and disintegrators for paper and text based media that have been assessed as capable of reducing information classified Secret, Top Secret and Protected C or lower to a size that, under the threat and risk conditions existing in urban Canada and with known reconstruction methodology, is deemed safe to dispose of or recycle as unclassified waste.

Type III destruction equipment is defined as shredders and disintegrators for paper and text based media that have been assessed as capable of reducing information classified Confidential and Protected A & B or lower to a size that, under the threat and risk conditions existing in urban Canada and with known reconstruction methodology, is deemed safe to dispose of or recycle as unclassified waste.

When Type II or Type III equipment is used as per approved operating procedures and is maintained in good working order, the resultant chaff may be disposed of or recycled as unclassified waste. Note that shredder approval for Type II and Type III destruction is based upon written text in 12 point font or larger on standard bond paper. Disintegrators are approved on the basis on screen size.

(information from the RCMP Security Equipment Guide G1-001... continued)

Table 1: Approved Office Category Paper Shredders and Disintegrators Selection Guide

Classification		Type	Shred Size (Maximum)	Disintegrator Screen Size See Note 3	Comments
Protected B (where a TRA recommends the use of approved equipment)	General office use	Type IIIA	2mm x 15mm	10mm	See note 1.
	Bulk destruction	Type IIIB	6mm x 50mm	13mm	Type IIIB equipment is approved for bulk destruction only and must not be used for periodic destruction.
Protected C	General office use	Type II	1mm x 14.3mm	6mm	Select Type II (level 6) equipment where a TRA recommends.
Confidential	General office use	Type IIIA	2mm x 15mm	10mm	Type IIIB equipment is approved for bulk destruction only and must not be used for periodic destruction.
	Bulk destruction	Type IIIB	6mm x 50mm	13mm	
Secret	General office use	Type II	1mm x 14.3mm	6mm	Select Type II (level 6) equipment where a TRA recommends.
Top Secret					

Notes to Table 1:

- Appendix B to the Operational Security Standard on Physical Security permits Protected A information to be destroyed by commercially available strip shredders (max 10mm width). Therefore Protected A is not included in Table 1, which is a selection guide for approved (SEG listed) equipment only. Appendix B also permits - as a minimum standard - Protected B information to be destroyed by commercially available strip shredders - where a TRA does not recommend selecting approved (SEG listed) equipment. Therefore, as indicated by the reference to a TRA, departments should consider if strip shredding is appropriate for their Protected B information. In light of the risks to protected information because of identity theft and the ease of reconstructing strip shreds, serious consideration should be given to selecting appropriate SEG listed shredders for Protected B information.
- The DNI Standard permits a larger particle size for Type IIIB in recognition of the reduced reconstruction risk due to the large volume of chaff generated by bulk destruction.
- Nominal screen size refers to the diameter or cross dimension of the hole in the screen as per manufacturer's technical literature. Actual performance depends on machine characteristics. Where manual verification of chaff is performed using a screen, this static (particles are not under pressure or force) screening of chaff after destruction is conservative (more secure).
- The Type III category included strip shredders until the Destruction Standard was revised in 2005. While strip shredders are still permitted by the Operational Security Standard on Physical Security Standard for Protected A and Protected B (subject to a TRA) information, Type III shredders are primarily intended for Confidential information and now limited to crosscut particles. Departments using strip shredders for Protected B information should consider upgrading to currently listed Type III (crosscut) shredders. Departments using strip shredders for Confidential information should replace them as soon as possible with currently listed Type III (crosscut) shredders.
- The security ratings and corresponding size standards in this table do not apply to microfilm or microfiche, which must be destroyed by equipment specifically approved for micrographic media.

Size Requirements for Commercial Destruction Service Providers

Destruction equipment used by destruction service providers is essentially subject to the same size requirements as RCMP approved office equipment. The exceptions for commercial destruction are detailed in the summary table.

(NEW 2011) The RCMP has established new size standards for **High Volume** destruction for Protected B, Confidential, and Secret per the following table.

Table - High Volume / Commercial Destruction (HVCD): Paper

Classification	Shred Size (Maximum)	Disintegrator Screen Size	Comments
Protected B (HVCD-PB)	16mm x 100mm	19mm (3/4")	Recommended for Protected B information of a medical, financial, or routine investigative nature.
Confidential (HVCD-C)	Area ≤ 300mm ²	13mm (1/2")	Recommended for Protected B information where a TRA recommends more secure destruction.
Secret (HVCD-S)	Area ≤ 150mm ²	9.5mm (3/8")	Commercial destruction is recommended only for special cases where large amounts of archived or accumulated material must be destroyed. Commercial destruction should not be used for routine destruction of Secret.
